

URBAN ENERGY ENTERPRISES

Fuel

Urban Energy (UE²) understands the fuel needs of our customers. We know that controlling fuel costs, fuel deliveries and fuel inventories are very important to our customers.

We provide a full range of fuel distribution options and services for wholesale, retail (C-stores), commercial and industrial businesses. Based on our fuel distribution experience, our customers can expect their fuel needs to be met in a safe, timely and professional manner. Customers can also benefit from our global commodity analytics and fuel hedging services. In this ever changing, volatile market, UE² recognizes the need to mitigate market price risks where possible.

Our fuel services include the following:

- * Dedicated delivery assets
- * 24x7 delivery service
- * Transport deliveries (6,500 to 9,000 gallons)
- * Tankwagon deliveries for smaller drops
- * Diesel fuel and gasoline delivery
- * Strong common carrier relationships throughout the Southeast
- * Terminal relationships throughout the Southeast
- * Storage and dispensing equipment - installation and service
- * Consigned fuel
- * Unbranded and branded products
- * Fixed fuel contracts
- * Fossil fuel marketing services including coal and coal related products

UE² can distribute Shell, BP and unbranded fuel products to dealers located throughout the Southeast.

Because of our strong alliances, UE² has the ability to contract supply agreements with major oil companies to purchase diesel fuel directly from the refineries. These supply agreements provide us with consistent supply of diesel fuel, distribution flexibility as well as volume purchase prices. These supply agreements are just one more example of the value that we bring to our customers.
